

Taking Climate Change to your Community

Conference, Fun-day & Training

3 easy steps to engaging your community:

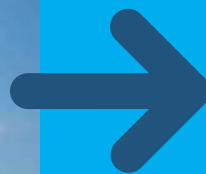

1

Choose your themes and topic

2

Select your combination of training days, conference and fun day activities

3

Let Talk Action do the rest!

Talk Action is happy to offer a new package of events to help build skills and expertise around Climate Change. As interest and concern grows around the global conference in Copenhagen in December, this is a critical time to build local concern and engagement. Our events can help to:

- Develop a greater understanding of how your organisation and community can contribute to delivering national goals and indicators
- Use existing frameworks of council staff and community groups to build engagement on these issues
- Deliver lasting, positive change to the local economy and environmental sustainability
- Build partnership work on climate change for healthier, stronger and happier communities

→ Your tailor-made package can include:

- A conference to act as a focal point for local activity
- Training events in the lead up to the conference
- A climate change focused 'fun-day' for younger people (which can run alongside the conference if required)

→ Conference & Training topics

- Community Action on Climate Change
- Climate Change Communication – getting the message across
- Working with communities
- Working with diverse groups
- Using the media around climate change
- Facilitation Training

→ Working with Communities

Talk Action is always keen to use existing platforms and networks to reach out in new ways to your local communities. Our team has many years experience working alongside councils, schools, community groups and businesses as well as campaign and pressure groups.

→ Event Management

Talk Action can run an entire event (from booking the venue, managing registration, providing catering etc.) or simply provide speakers and trainers. Our expert team of sustainable event consultants will also ensure that the events we run for you are compliant to BS8901, the British Standard for sustainable event management.

→ Our contacts

We have excellent links with many relevant organisations and can engage high quality speakers from environmental organisations including:

- Defra
- Friends of the Earth
- The Environment Agency
- WWF
- The Centre for Alternative Technology
- Specialists on issues such as energy, food, transport, renewables etc.

→ Training

Our climate change training can be for council staff, councillors, or for local voluntary groups. We recommend running one course within the council and one course for the wider community. By holding the training sessions before a conference we can build skills so that those involved can play an active part in running the event.

→ Costs

The cost of these events are competitive and flexible: if you are interested please call us to discuss what kind of events might suit you.

→ About Talk Action

Talk Action has trained over 500 people and run numerous green events, conferences and environmental education projects. Clients include: Defra, The Environment Agency, The European Commission, BBC, Westminster Council, The City of London and local authorities across the UK.
